Welcome to Biopharma Academy of Clinical Research

The clinical research industry stands at the forefront of medical innovation, driving the development of life-saving therapies, transformative medical devices, and groundbreaking biotechnology. As clinical trials increase in complexity and scale, the demand for rigorously trained research professionals has never been greater.

Biopharma Academy of Clinical Research has been established to meet this demand head-on. We offer a modern, accessible, and industry-aligned educational experience designed to equip aspiring clinical research professionals with the knowledge, practical skills, and professional readiness required to enter and thrive in the field. As an educational division of Biopharma Informatic LLC, a nationwide clinical research investigator network with over 15 years of active trial experience, this academy has been built from the inside out. Our trainers are not observers of clinical research. They are practitioners who run active studies across more than 30 sites every day.

Our Founding Mission

Clinical research is one of the most rewarding and impactful careers in healthcare, and Biopharma Academy is your stepping stone into it. We are committed to equipping our students with the knowledge and skills necessary to excel in this field, through training that is practical, industry-focused, and entirely on your own terms. Here, your professional goals are within reach.

Why Biopharma Academy

- Built on over 30 years of cumulative educator experience
- Flexible, self-paced program designed for busy professionals
- Industry-aligned curriculum developed by active clinical research professionals
- Hands-on training at real clinical research sites
- Open to anyone who wishes to step into a clinical background.

Meet Our Team

Biopharma Academy is guided by the founding leadership of Biopharma Informatic, a group that has spent more than a decade building one of the country's most active clinical research investigator networks.

Dr. Syed A. Naqvi President

Founder and President of Biopharma Informatic since 2010, Dr. Naqvi has grown the organization into a nationwide network serving more than 30 active research sites. His strategic leadership directly shapes the academic direction of Biopharma Academy.

Shuja Naqvi Chief Executive Officer

As CEO of Biopharma Informatic and co-founder of Biopharma Academy, Shuja oversees operational excellence and strategic growth across all Biopharma entities, ensuring that the Academy remains tightly aligned with real-world industry demands.

Dr. Humayun Naqvi, MD, MBA

Medical Director

Dr. Humayun provides clinical and scientific oversight for all curriculum content, ensuring every module and training activity reflects current Good Clinical Practice standards and FDA regulatory requirements.

Rachel Koenning

Program Director

With extensive experience in clinical trials, site operations, and research education, Rachel has led the creation of this comprehensive course from the ground up. Her expertise, dedication, and passion for training the next generation of clinical research professionals have shaped the program into a practical, industry-focused learning experience.

Our Instructors

All Biopharma Academy educators are working professionals in the clinical research field. They hold advanced academic degrees in relevant disciplines, along with credentials including CCRP, CCRC, CCRA, or equivalent certifications.

Program Overview

Biopharma Academy's program consists of eighteen online, self-paced modules designed to fit around your schedule and commitments. Students may progress through the coursework at their own pace, making this an ideal program for those managing professional or personal responsibilities alongside their studies.

Upon successful completion of all modules, students move on to hands-on training, where they gain practical experience and apply the knowledge learned throughout the program in a real-world clinical research setting. This combination of flexible online learning and experiential training helps prepare students for careers in the clinical research industry.

Curriculum at a glance:

- Eighteen online, self-paced modules - varying times, approximately 2.5 hours of coursework
- Estimated total program duration: approximately 146 hours (2.5 hours c + 3 hours comprehensive exam + 140 hours hands-on training)
- Flexible class schedule
- Open to all individuals aspiring to enter the clinical research field
- Comprehensive exam after completing the modules
- Hands-on training at real research sites
- Guided by educators with over thirty years of cumulative experience

Who Should Apply

Getting started is simple. To be eligible, applicants must:

- Be eighteen years of age or older
- Be fluent in the English Language
- Eligible for all individuals aspiring to enter the clinical research field; no prior experience required

Applicants should also have initiative and a genuine enthusiasm for learning. This program is designed for individuals who are motivated, curious, and eager to build knowledge and practical skills in clinical research.

To enroll:

- Submit your information to the biopharmaacademy.com/getenrolled
- Complete the form
- A representative of the Biopharma Academy team will be in touch with enrollment information

Comprehensive Exam

Upon completing all eighteen modules, students will complete a comprehensive exam. The exam is designed to assess understanding across all areas of the curriculum.

Format: Multiple-choice questions

Duration: 3 hours

Passing score: 80% or higher

Hands-On Training

Students who pass the comprehensive exam with a score of 80% or higher will qualify for a four-week hands-on training experience across training site, totaling approximately 146 hours. This practical component bridges the gap between academic learning and real-world clinical research operations.

During training, students will gain hands-on exposure to industry-standard systems including:

- **CTMS (Clinical Trial Management System)** — Students will practice scheduling visits, checking tasks, and viewing mock participant information
- **eSource / EDC (Electronic Source & Electronic Data Capture)** — Students will practice data entry and trial workflow in a mock project environment, without affecting any live study data

This experience is designed to ensure that graduates are not only knowledgeable but genuinely prepared for the demands of an active research environment.

Certificate of Completion

Upon successful completion of all program requirements, a Certificate of Completion will be issued. To qualify, students must:

- Complete all 18 self-paced online modules
- Pass the comprehensive exam with a score of 80% or higher
- Complete the four-week hands-on training with minimal absences and reflective scores to ensure understanding of the material.

Minimum Passing Standard

A score of 80% or higher is required on all module assessments. Students must also complete at least 80% of all assigned coursework to be eligible for program completion and certificate issuance.

Employment Opportunities Within Biopharma Informatic

Students who perform with distinction and demonstrate the qualities that active research sites require may be considered for employment within Biopharma Informatic's site located at Houston. These opportunities are competitive and performance-based, and are not available to all graduates. No guarantee of employment is expressed or implied by enrollment in any Biopharma Academy program.

If an opportunity within Biopharma Informatic is not available, our recruitment team will proactively seek a suitable opportunity in your local area.

A Note Before You Begin

Choosing to invest in your professional future is a meaningful step. At Biopharma Academy, we are here to support you at every stage of that journey, from your first module to your certificate and beyond. We look forward to welcoming you into the clinical research community.
